# V03S-K, V05S-K, V07S-K (SiF, SiFF)

**Technical specification:** PN-KV-057-99

**Rated voltage:** 300/300 V (V03S-K)  
300/500 V (V05S-K)  
450/750 V (V07S-K)

**Test voltage:** 2 kV (V03S-K, V05S-K)  
2,5 kV (V07S-K)

**Temperature range for handling:** -55 °C to +180 °C \*)

**Colour of insulation:** black (BK), brown (BN)  
blue (BU), red (RD),  
green/yellow (GNYE),  
natural (NC), grey (GY),  
orange (OR), violet (VT)  
Other colours on request.

**Deliveries:** coils, drums, reels

#### Construction:

1. Stranded tinned copper conductor (or only plain conductor - verzion nec.), class 5 acc. to ČSN EN 60228 (on request class 6 - applies to SIFF)
2. Silicone rubber insulation

\*) It is possible to produce cable with temperature range for handling from -55 to +220°C.

#### APPLICATION

For instalation in machines and equipment with increased thermal stress, for distribution in movable equipment, distribution in boards, switchboards and switching stations in environments with increased temperature stress. The insulation is resistant to ozone, corona, UV radiation, fungi, diluted acids and alkalis.

Type of conductor	Nominal cross-section core (mm <sup>2</sup> )	Shape of core	Nominal thickness of insulation (mm)	Average overall diameter (mm)	Rated current *) (A)	Time heating constanta (s)	Content of Cu (kg/km)

Interconnecting wires insulated with  
silicone rubber

## V03SJ-K, V05SJ-K, V07SJ-K (SiF-GL)

**Technical specification:** PN-KV-057-99

**Rated voltage:** 300/300 V (V03SJ-K)  
300/500 V (V05SJ-K)  
450/750 V (V07SJ-K)

**Test voltage:** 2 kV (V03SJ-K, V05SJ-K)  
2,5 kV (V07SJ-K)

**Temperature range for handling:** -55 °C to +180 °C \*)

**Colour of insulation:** natural (NC)  
Other colours on request.

**Deliveries:** coils, drums, reels

### Construction:

1. Stranded tinned copper conductor or only plain conductor - verzion nec.), class 5 acc. to ČSN EN 60228
2. Silicone rubber insulation
3. Protective cover of painted braiding of glass silk

\*) It is possible to produce cable with temperature range for handling from -55 to +220°C.

### APPLICATION

The cables are designed for installation to appliances and equipment in environments with thermal stress, for installation in moveable equipments in distribution boards, switchboards and switching stations with higher thermal stress. Cables are not resistant to flame spreading, to fungi and to humidity.

Influence on the environment: The product does not have any negative influance on the environment.

**Technical specification:** PN-KV-057-99

**Rated voltage:** 2/3,6 kV (50Hz)

**Test voltage:** 6 kV (50Hz)

**Temperature range for handling:** -55 °C to +180 °C \*)

**Colour of insulation:** natural (NC)  
Other colours on request.

**Deliveries:** coils, drums, reels

#### Construction:

1. Stranded tinned copper conductor  
class 5 acc. to ČSN EN 60228
2. Silicone rubber insulation  
Identical replacement of cable CSA 2/3,6

#### APPLICATION

For the distribution of electrical energy in high-voltage equipment, under the simultaneous influence of higher operating temperatures or heavy-duty conditions. The insulation is resistant to ozone, corona, UV radiation, moulds, diluted acids and alkalis. Chlorinated aromatic hydrocarbons cause for swelling and reduced mechanical and electrical properties.

Nominal cross-section of core (mm <sup>2</sup> )	Nominal thickness of insulation (mm)	Maximal overall diameter (mm)	Rated current *) (A)	Informative weight (kg/km)	Informative despatch lenght (m)
0,8	1,6	4,9	25	26	100
1	1,8	5,6	30	33	100

Numerical data are not guaranteed, and they are subject to changes without notification.

Influence on the environment: The product does not have any negative influence on the environment.

## Interconnecting single-core high voltage wire

CSD 0,35-10

**Technical specification:** TP 12-41 MHS 332/80

**Rated voltage:** 10 kV<sub>ss</sub>

**Test voltage:** 19 kV<sub>ss</sub>

**Temperature range for handling:** -55 °C to +180 °C \*)

**Colour of insulation:** natural (NC)  
Other colours on request.

**Deliveries:** coils, drums, reels

**Construction:**

1. Stranded tinned copper conductor
2. Silicone rubber insulation

**APPLICATION**

For inner-connection of high voltage circuits. It is resistant to flame spreading, but not to moulds and UV radiation.

Nominal cross-section of core (mm <sup>2</sup> )	Maximal resistance of core at 20°C (Ω/km)	Maximal overall diameter (mm)	Rated current *) (A)	Informative weight (kg/km)	Informative despatch lenght (m)
0,35	58,133	4,5	16	21	100

\*) Values of current carrying capacity in air at +90°C.

Numerical data are not guaranteed, and they are subject to changes without notification.

Influence on the environment: The product does not have any negative influence on the environment.

**Technical specification:** TP 12-41 MHS 332/80

**Rated voltage:** 3 kV (50Hz)

**Test voltage:** 12 kV (50Hz)

**Temperature range for handling:** -5 °C \* to +85 °C \*\*

**Colour of insulation:**  
I. insulation: natural  
II. insulation: black

**Deliveries:** coils, drums, reels

**Manufacture to order**

#### Construction:

1. Stranded tinned copper conductor
2. I. insulation silicone rubber
3. II. insulation heat resistant PVC

\* If mechanical stressing is excluded, the cable can be used down to -30 °C.

\*\* In cases, when a lower value of insulation resistance can be admitted and cable is not mechanically stressed, then it can be used up to +150 °C.

#### APPLICATION

The cable is intended for inner-connection of heating circuits in electric and motor trains. Sheath is resistant to flame spreading, oil and petrol acting, but it is not resistant to moulds and UV radiation.

Nominal cross-section of core (mm <sup>2</sup> )	Maximal resistance of core at 20°C (Ω/km)	Maximal overall diameter (mm)	Rated current *) (A)	Informative weight (kg/km)	Informative despatch lenght (m)

## Interconnecting single-core wire

**Technical specification:** TP 03/41 MTP 608/67

**Rated voltage:** 300/500 V (cross-section 0,5 mm<sup>2</sup>)  
450/750 V (cross-section 1,5 mm<sup>2</sup>)

**Test voltage:** 1,5 kV (cross-section 0,5 mm<sup>2</sup>)  
2,5 kV (cross-section 1,5 mm<sup>2</sup>)

**Temperature range for handling:** -55 °C to +180 °C

**Colour of insulation:** natural

**Colour of sheath:** natural

**Deliveries:** coils, drums, reels

**Construction:**

1. Stranded tinned copper conductor  
class 5 acc. to ČSN EN 60228
2. Insulation silicone rubber
3. Braid tinned copper wires
4. Silicone rubber sheath

**APPLICATION**

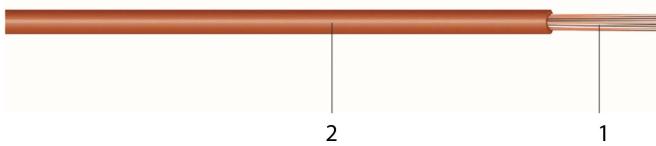

For internal and external connections of electrical devices and equipment in difficult operating conditions (temperature, chemical, etc.), without causing friction, impacts, scratches. It is resistant to UV radiation, moulds and most chemicals. It is not resistant to chlorinated aromatic hydrocarbons and flame spreading.

Nominal cross-section of core (mm <sup>2</sup> )	Nominal thickness of insulation (mm)	Nominal thickness of sheath (mm)	Maximal overall diameter (mm)	Rated current *) (A)	Informative weight (kg/km)	Informative despatch lenght (m)

1,5	0,8	0,7	5,8	52	54	100

\*) Values of current carrying capacity in air at +90°C.

Numerical data are not guaranteed, and they are subject to changes without notification.

Influence on the environment: The product does not have any negative influence on the environment.

**Technical specification:** PN-KV-021-93

**Rated voltage:** 300/500 V

**Test voltage:** 2 kV

**Temperature range for handling:** -55 °C to +180 °C \*)

**Colour of insulation:** black (BK), brown (BN)  
blue (BU), red (RD),  
green/yellow (GNYE),  
natural (NC), grey (GY),  
orange (OR), violet (VT)  
Other colours on request.

**Deliveries:** coils, drums, reels

**Manufacture to order**

#### Construction:

1. Stranded plain copper conductor
2. Silicone rubber insulation

\*) It is possible to produce cable with temperature range for handling from -55 to +220°C.

#### APPLICATION

Structural elements guaranty high flexibility and plasticity with maintenance of wide temperature range for handling with minimum claim on necessary mechanical force for flex. It is possible to use this property for example for electric sensors of various value working in moveable mode and so on. It is recommended to protect cable from increased mechanical straining due to abrasion, nick and so on.

Nominal cross-section core (mm <sup>2</sup> )	Construction of core (n x n x mm)	Shape of core	Nominal thickness of insulation (mm)	Average overall diameter (mm)	Maximal resistance of core at 20°C (Ω/km)	Rated current *) (A)	Content of Cu (kg/km)

Numerical data are not guaranteed, and they are subject to changes without notification.

Influence on the environment: The product does not have any negative influence on the environment.

<b>Technical specification:</b>	TP 12-41 MHS 235/77
<b>Rated voltage:</b>	300/500 V
<b>Test voltage:</b>	4 kV
<b>Temperature range for handling:</b>	+5 °C to +90 °C
<b>Colour of insulation:</b>	see the table
<b>Colour of sheath:</b>	black (BK), blue (BU)
<b>Deliveries:</b>	coils, drums, reels
<b>Manufacture to order</b>	

**Construction:**

1. Stranded tinned copper conductor  
class 5 acc. to ČSN EN 60228
2. Silicone rubber insulation
3. Heat resistant PVC sheath

**Fire technical characteristics:**

The cable is resistant to flame propagation according to request of fire technical characteristics given acc. to Decree No. 246/201 Col.

**APPLICATION**

The cable is designed for terminals of cables heating circuits for large area heating. For fixed instalation in concrete, plaster floor and under plaster. The cable is resistant to flame propagation and to fungi.

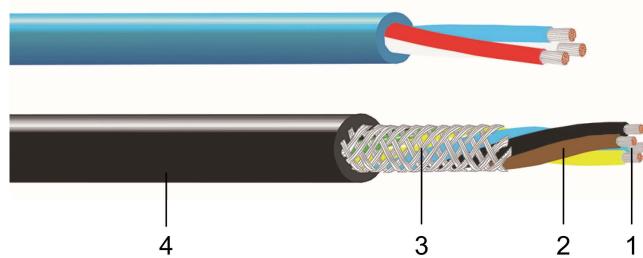

Nominal cross-section core (mm <sup>2</sup> )	Shape of core	Nominal thickness of insulation (mm)	Nominal thickness of sheath (mm)	Maximal overall diameter (mm)	Maximal resistance of core at 20°C (Ω/km)	Colour of insulation	Content of Cu (kg/km)

Influence on the environment: The product does not have any negative influence on the environment.

## Heat-resistant interconnecting multi-core flexible cables

## TBVS, TBVFS

**Construction:**

1. Silver-coated stranded copper cores
  2. Fluoroplastic FEP
  - Cores are twisted together.
  3. Screen (TBVFS): Braid or wrapping of tinned Cu wires
  4. Sheath: Silicone vulcanizate
- TBVFS** - improved electromagnetic compatibility

**Technical specification:**

PN-KV-020-92

**Rated voltage:**

300 V (up to and incl. cross-section of 0,22 mm)

500 V (from cross-section 0,34 mm)

**Test voltage:**2 kV - conductors to screen (TBVFS)  
4 kV - conductors to water**Temperature range for handling:**

-55 °C to +180 °C

**Colour of insulation:**0 - black (BK), 1 - brown (BN),  
2 - red (RD), 3 - orange (OR),  
4 - yellow (YE), 5 - green (GN),  
6 - blue (BU), 7 - violet (VT),  
8 - grey (GY), 9 - white (WH)**Colour of sheath:**blue (BU), black (BK),  
brow (BN), red (RD)  
Other colours on request.**Deliveries:**

coils, drums, reels

**Manufacture to order****APPLICATION**

The cable is as a rule intended for mutual flexible inter-connection of elements, circuits and devices that are working under aggravated service conditions. Cable can be successfully used for application that require increased flexibility and heat resistance with small external dimensions of inter-connecting wiring. There is necessary to exclude action of mechanical influences on cable sheath (enhanced danger of mechanical damage) with use. This cable has very low signal transmission losses due to excellent dielectric (low capacitance losses of FEP insulation) and high conductor conductivity (silver-coated copper). Manufacturer does not recommend to use the cable for electric power transmission. The cable is resistant to ozone, corona, UV radiation, moulds, diluted acids and alkalies. Chlorinated hydrocarbons give cause for swelling of sheath and degrade its mechanical properties. Cable is not resistant to flame propagation.

No. of cores x cross-section of core (n x mm <sup>2</sup> )	No. of wires x maximal diameter of wires in core (n x mm)	Maximal conductor resistance at 20°C (Ω/km)	Insulation thickness (mm)	Sheath thickness (mm)	Maximal core diameter (mm)	Maximal overall diameter TBVS (mm)	Maximal overall diameter TBVFS (mm)
